HOBBIES

I enjoy volunteering for my local Scout Troop (1st Lytchett Minster Scouts) and have been in the Scouting movement for over 7 years now, moving from a Scout to a qualified leader. I work with the leader team to produce and execute a fun, exciting and interesting program for the Scouts, providing them with skills for life. I also enjoy camping and hiking, and regularly volunteer for weekend camping trips.

Programming and gaming are also important hobbies that I am passionate about. I find them both challenging and interesting. I mainly enjoy playing relaxing sandbox or colony management games like Minecraft and Stardew Valley, but also enjoy playing strategy and RTS games with friends like Civilisation V.

At my university I am passionately involved in the Scouts and Guides society as well as the hiking club. I enjoy these societies as a break from my studies and a way to continue my Scouting while at University.
